Financial Review By ERIC KOBBE Of Blythe-Witter Co.

Financial Operations Some large operations in the money market which transpire on this date and their resultant effect on the money market are subjects of decided interest. These transactions include the payment of semi-annual interest on the \$6,500,000,000 fourth Liberty loan; the retirement of one large treasury note issue and payment on a new one; and the liquidation of the \$500,000,000 Anglo-French loan

The general consensus of opinion is that these operations will largely offse one another, and will not cause a further tightening of money rates. A \$170,000,000 issue of treasury certicates matures on this date, and this amount will be paid into the banks by the treasury and will thus be made available for new operations. Although the treasury looks with approval on a

new issue of \$100,000,000 and will re-

ceive tenders on same, and these two

transactions will generally offset one another, these funds will demain with the banks for some few days before being called in. Gold has already been shipped in for the redemption of a large part of the \$500,000,000 Anglo-French loan and funds for the balance of the issue have been obtained by France trough its atest issue of 25 year 8 per cent gold bonds. Undoubtedly this money will be available for re-investment immediately. As a result there should be no noticeable tightening of money for any extensive relaxation until buvers appera for the large stocks of com-
